

## **B.M.I.D. Water Main Shut Down - Saturday January 30, 2016**

Please be advised, on Saturday January 30, 2016, there will be a planned shut down of water service in effect during the hours of 4:00 am to approximately 6:00 pm. Please be advised that there will be **NO** domestic water supply during this period. Fire and Emergency Services have been notified.

This shut down is necessary for BMID to make improvements to the water supply system and drinking water quality. An Ultraviolet Disinfection Facility and pipeline project valued at approximately \$10,000,000 is currently under construction expected to be commissioned in this fall. BMID will be utilizing the UV disinfection in addition to chlorination as required by Interior Health Authority. Crews will make every effort to minimize the length of time customers are without water.

Area of affected properties (Shown in red):

Crews recommend storing water in the fridge for drinking. Store water in your bathtub, clean pails, sinks, jugs or any clean container that is appropriate to hold water. We encourage the public to keep enough water on hand should the water service interruption be longer than noted.

Once service has been restored, you may experience murky or cloudy water caused by air in the lines. To correct, please run your taps until the water runs clear. Domestic water supply for the month of February during the course of construction improvements, will be provided from the Rutland Water Works distribution system. Please be aware you may notice slight changes in the characteristics of your water during this period.

Potable water will be available at BMID offices at 285 Gray Road between the hours of 11:00am and 3:00pm on Saturday January 30, 2016 free of charge. Please bring your own clean containers, appropriate to carry water.

Your co-operation and patience during the construction period is crucial and very much appreciated. We apologize for any inconvenience this may cause.

Should you have any questions, or require assistance during the shut down, please contact the BMID office at (250)765-5169.
