**BMID SCOTTY CREEK SERVICE AREA
CORNISH RD, MORRISON RD, AND OLD VERNON RD CONSTRUCTION
May 19th, 2026**

The Black Mountain Irrigation District is notifying customers in the north end of Kelowna who travel on Cornish Rd, Morrison Rd, and Old Vernon Rd that there will be construction starting May 19th, 2026 and will be running until October 2026.

BMID is installing an irrigation main running from BMID's Cornish Well site towards the Scotty Creek Subdivision. This irrigation main will strengthen the irrigation water supply and provide up to 126 L/s to the north end of BMID's water service area.

BMID is working with the City of Kelowna to minimize disruption to the public by coordinating overlapping work. The watermain installation will be followed by asphalt paving on Cornish Rd, Morrison Rd, and Old Vernon Rd.

There will be traffic disruptions during construction timeframe that include:

- 1 lane alternating traffic on Old Vernon Rd throughout the day.
- Road closures at night when teams are working on the corner of Old Vernon Rd.
- 1 lane alternating traffic and road closures on Cornish Rd and Morrison Rd during the day.
- Domestic service reconnections on Cornish Road. Affected homeowners will be notified before these works are to be conducted.

For a map of the paving and watermain installation locations, please see below.
